Safety circular - monsoon and fire

Monsoon (Edavappathi) precautions

Clear drains and gutters, trim branches near power lines and keep the number of the KSEB emergency line (1912) handy. Do not touch fallen wires.

In case of fire

Call 101. Switch off the gas regulator and the mains if it is safe to do so. Move to the road and help elders and children first.

Residents needing assistance

Residents who cannot move quickly are requested to inform the committee so that a neighbour can be assigned to help during an emergency.
